Con la cartuccia **ENERGYSAVE** all'apertura con leva in posizione centrale eroga unicamente acqua fredda, evitando così l'inutile accensione della caldaia e il conseguente spreco di acqua calda, con il beneficio di un notevole risparmio energetico ed economico.

La regolazione della temperatura avviene normalmente ruotando la leva verso sinistra, fino alla temperatura massima.

With **ENERGYSAVE** cartridge when opening with lever in central position delivers cold water only, thus preventing the water heating system from starting.

This grants a significant benefit in energy and cost saving.

Any water temperature regulation is normally operated by turning lever left, towards adjustable maximum temperature position.

Avec la cartouche **ENERGYSAVE** lors de l'ouverture en position centrale débite uniquement de l'eau froide, évitant ainsi le déclenchement inutile de la chaudière et le gaspillage d'eau chaude qui en dérive, au bénéfice d'une économie significative d'énergie et financière.

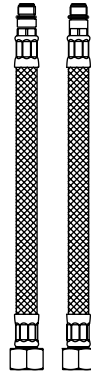

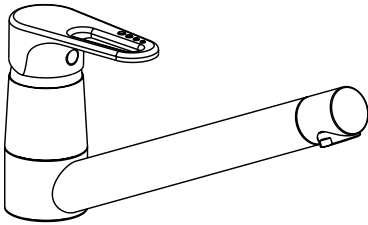

Le réglage de la température se fait normalement en tournant la manette vers la gauche, jusqu'à obtenir la température maximum.
